

end of semester slides:

reflection and deconstruction

forge semester: rose thorn ... bud

# ahhhh professional development

- what is a leadership and technical goal that you feel you have accomplished ?
- what is something you are proud of doing this semester at forge?
- -

# ahhh professional development

- open goals from the beginning of the summer
  - does it match up ? did your goals change?

-

# ahhh professional development

- looking back, is there something you would do differently?
- if so where else could you implement this change

# deconstruct projects

- take apart projects and find homes for reusable material

# Life Cycle Analysis

- Choose a common component
- Researching it
  - Ex: material of silicon, 3D Filament
- Taking a step back:
  - What is the labor to make a part of a project
- What is the waste of the product ?

why should we look at the greater life cycle of our work?
